

CEMLINE

Vandex introduce the CEMLINE range

Waterproofing and Concrete Protection products into the Potable Water Industry.

This year Vandex, celebrates 70 years of providing innovative technology and products for preventing the penetration of water into concrete and with the rapid growth for the need of certified products and system for the protection, repair and rehabilitation of potable water structures Vandex has launched the CEMLINE range.

Products in the CEMLINE range are DWI and WRAS listed.

As the inventors and market leaders in Crystalline Waterproofing Technology Vandex has an extensive range of products and systems which meet the requirements of International Standards & Certifications for use in Potable Water Structures. By grouping these products under the new CEMLINE brand name, specifiers and engineers can now easily choose a CEMLINE product or system to meet any Waterproofing or Protection requirement for their Potable Water Structure.

SCP Concrete Sealing Technology Ltd and Bluebay Building Products Ltd have been appointed by Vandex to provide the Potable Water Market sector with Vandex & CEMLINE stock availability and local technical service & support throughout the UK, supported by the UK based Vandex team and the extensive services of the International Vandex Technical Service & R&D Department.
